

System Test

Develop AngularJS Project with the following requirements

1. Create a Page which has the below form elements

- a. Employee Id
- b. Employee Name*
- c. Designation
- d. Salary*
- e. Email*
- f. Mobile*
- g. Gender*
- h. Languages Known(Checkbox)
- i. Qualification

And a Submit button which is used to save fields data.

Designation options are like Manager, Software Developer, Software Testers, Admin (Dropdown)

Gender Options Male Female Others (Radio Button)

2. **Validations**

- a) Apply form validations based on the mandatory (marked with *) fields.
- b) Email validation should be in email format.
- c) Mobile number allow only numeric, restrict 10 digits and start with 6 or 7 or 8 or 9.
- d) Salary should allow decimals and allows only numeric.
- e) Validation messages should display beside the fields.

3. Save data in Browser Local Storage on **submit** button click

4. Clear form data on **Reset** Button click

5. Add a link as **View Employers** and display employers list by reading list from local Storage by Hiding form elements.

Add **Edit** and **Delete** Employers functionality to employers list
